Bisphenol A propoxylate

Bisphenol A propoxylate, hydroxyl value 310 – 335 mg KOH/g · RS-BPA_2PO · CAS 37353-75-6 · Technical Data Sheet · RawSource · rawsource.com/product/bisphenol-a-propoxylate/

CAS NO.	PRODUCT CODE	PRODUCT TYPE
37353-75-6	RS-BPA_2PO	Propoxylated bisphenol A · diol monomer

Bisphenol A propoxylate is a diol monomer made by polymerizing bisphenol A and propylene oxide. It is insoluble in water and soluble in solvents such as ethanol, ether and toluene. At room temperature it is a white solid or a viscous liquid. The hydroxyl value is 310 – 335 mg KOH/g.

RELEASE SPECIFICATION

PARAMETER	SPECIFICATION
Appearance	White solid or sticky liquid
Color (APHA)	60 max
pH value (1 % solution)	5.5 – 7.5
Moisture (wt %)	0.20 max
Hydroxyl Value (mg KOH/g)	310 – 335

Each lot is released against this specification. Lot-specific results are reported on the Certificate of Analysis that ships with every delivery.

KEY FEATURES

- Low odor
- Good flexibility
- High reactivity
- Improves the mechanical strength of downstream products
- Enhances aging resistance
- Good chemical corrosion resistance
- Good electrochemical performance

APPLICATIONS

- Toner resin
- Polyurethane glue

Applications are those stated for the product. Confirm suitability for each formulation by trials.

PACKAGING AND SHELF LIFE

- Shelf life: 12 months from production date.

The information in this Technical Data Sheet is provided for technical evaluation and is believed to be accurate as of the issue date. Typical values are representative and do not constitute a warranty. Binding specifications are those stated on the lot-specific Certificate of Analysis and in the sales contract. Users should verify suitability for their own process and regulatory requirements. Refer to the Safety Data Sheet before handling. Questions: solutions@rawsource.com.
