

Polyether–Modified Trisiloxane Surfactant

Polyether–modified trisiloxane (agricultural superwetter)

PRODUCT CODE	CAS NO.	ISSUED
RS-AG SPREADER	67674–67–3	July 2026

§1 PRODUCT DESCRIPTION

A polyether–modified trisiloxane surfactant (agricultural superwetter) supplied as a liquid concentrate.

§2 TYPICAL PROPERTIES

PROPERTY	SPECIFICATION	TYPICAL VALUE
Appearance	—	Colorless to light amber liquid
Viscosity (25 °C, mm ² /s)	—	30–50
Surface tension (25 °C, 0.1%, mN/m)	—	<20.5
Density (25 °C)	—	1.01–1.03 g/cm ³
Cloud point (1% wt)	—	<10 °C

PACKAGING

Standard industrial packaging; drum, IBC, or bulk options quoted per order.

DOCUMENTATION

Full SDS available on request. Lot–specific CoA ships with every order.

Values shown are typical of recent production and do not constitute a sales specification; the lot–specific Certificate of Analysis governs for any shipment. Product is supplied for industrial use only.

Typical batch values, provided in good faith. Contact solutions@rawsource.com for batch–specific data.
